About

I am a passionate and dedicated budding technologist, deeply intrigued by the world of programming. As I navigate through my second year of pursuing a BSc Honors degree in Computer Science at McMaster University, I have dedicated the past 8 months to immersing myself in a diverse array of programming languages and technologies. Python, HTML, CSS, SQL, and C have been my playground, allowing me to explore and experiment with the foundations of software development. This journey has further ignited my curiosity and solidified my commitment to mastering the art of coding.

Experience

Intern, Zenit Excelencia   **Delhi, India**
Duration: Jul 2023 - Aug 2023

- At Zenit Excelencia's IT department, Utilized Python Pandas for data challenges, managing extensive Excel datasets.
- Contributed to user experience enhancement on Zenit's website.
- Developed course import/export mechanisms, boosting platform performance.

Education

McMaster University   **Hamilton, Ontario**
BSc in Computer Science   *Expected Graduation: Dec 2026*

Skills

Problem-solving: Coursework and coding challenges.

Python: Data analysis, scripting, automation.

JavaScript: Front-end web, interactive UI.

C: System-level programming, algorithms.

Haskell: Functional programming, logic.

Elm: Functional front-end development.

HTML5: Structured, semantic web content.

CSS: Responsive, visually appealing layouts.

Git: Collaborative, organized code management.

GitHub: Sharing, collaborating on projects.

Bash scripting: Automating tasks, system admin.

Linux: Navigation, development on Linux.

Projects

Personal Website: Created using HTML, CSS and JavaScript**.**

Favorite Quotes: Designed a webpage to display and rotate through favorite quotes using HTML, CSS, and JavaScript.
